

BUSINESS ADVICE

If you want advice then we are ready to provide it and it just may be that you fall into one of the following categories:

- You have a good business but are facing some tough decisions.
- You have a good business and need some honest objective input as to where to next.
- You have a business that has the speed wobbles.
- You have a good business but are reluctant to employ. So what are your options or alternatives?
- You have a business that needs funds to develop growth.

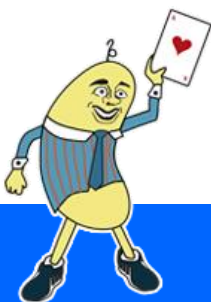

We can provide you with an in depth analysis of where you are at and this could be quite different to where you think you might be at. We are upfront and straight talking and yet appreciate that things need to be personable, that your business may be run by family, maybe by a husband and wife. We understand the family dynamics of running a business.

Don't just "think" about calling us because you will get too busy and put this aside. Pick up the phone now and give us a call. When we meet up you'll be impressed with what we know.

People talk all the time about growing their business, but the reality is that you can't grow your business unless you invest in yourself first. You can't have a better business unless you start making better business decisions, and you can't do that until you become a better business person. We can help you be that better person.

Here is what is on offer ...

If you leave our meeting without any new ideas or a different approach that will be of benefit, then it will have still been worthwhile because on your way out, waiting at Reception, will be a giant bag of Perriams Jelly Beans!
