

# THE ALL BEAN

**What other occupation can you think of that has more similarities with our National game than that of an Accountant?**

We've gathered our squad of 22 similarities ...

- We are passionate about what we do
- We rely on numbers to get results
- We perform better with good figures
- We are big on statistics
- We work in units
- Rugby is governed by the IRD, we've got the IRD!
- We've always got our eye on the ball
- You break the rules, you get penalized
- We both talk a lot about turnovers
- We both work with our GP's
- Both codes are played using straight lines
- The front desk and the front row is where it all starts
- We don't like getting screwed
- We both like that ten minute break
- We need to respond to all calls
- If you go over in touch then you're out
- We both rely heavily on our support crew
- Transfers are common to both practices
- Our results rely significantly on accuracy
- Good practices deliver good results
- Game plan, business plan, what's the difference?

**So next time you're out and about, it could easily be the Accountant who's worth a shout!**
